180	81	150	162	120	243		

Note: For averages of 100 or less, calculate handicap this way:

Subtract average from 210 Multiply the answer by 2.7

Throw out the fraction on final answer and use whole number.

Example: Average 97

$$210 - 97 = 113$$

$$113 \times 2.7 = 305.10$$

Three-game handicap is 305
